EDUCATION

ITM Vocational University **July 2019 – May 2023**
B.Tech Computer Science Engineering (GPA 3.8)

CERTIFICATION

Azure AI Engineer – Associate **June 2025**
Azure Fundamental **October 2021**

EXPERIENCE

DREVOL LLC – Automation engineer **August 2024 – Present**

- **Engineered and optimized** Azure cloud automation scripts and PowerShell workflows, **streamlining deployment processes, reducing operational delays by 30%**, and **cutting manual effort by 40%**.
- **Identified, resolved, and validated** post-deployment performance and compatibility issues improving uptime by 25%, ensuring **100% Windows update reliability**, and **achieving a 95–98% error-free deployment success rate**.
- **Collaborated with internal teams and clients** to enhance cloud processes and streamline deployments, **reducing project delivery time by 20%** and improving overall service efficiency.
- Built and leveraged a custom S360 dashboard to monitor and resolve critical security and compliance metrics, maintaining secure and compliant cloud operations.
- **Worked with Microsoft Intune** to enroll multiple devices, ensure compliance across the organization, and remotely deploy applications to all devices, enabling secure and efficient rollouts.

VISHAG TECH PVT LTD – Cloud Engineer **June 2022 – July 2024**

- **Resource monitoring and optimization** on **AWS** and **Azure** led to a **30% increase in scalability** and a **20% reduction in operational costs**.
- **Linux and Windows Server administration**, including **patch management** and **monitoring**, resulted in a **25% increase in system performance uptime**.
- Conducted **advanced debugging** of **AWS instances** like **EC2, S3, and CloudFront**, achieving a **95% first-time resolution** and ensuring **almost zero downtime**, which enhanced system reliability.
- Delivered **timely and sufficient client support** for critical events, resolving **99% of issues** promptly and maintaining **high customer satisfaction levels** in high-pressure situations.

PROJECT

Azure VM Deployment Automation :- Created a script to **deploy multiple VMs from the image**, accelerating deployment by 50% and improving scalability for high-demand applications. To strengthen security, integrated **Just-In-Time (JIT) access**, reducing attack surfaces by 25% while enabling smooth administrative workflows for deployed VMs. also automated the **installation of the Geneva Monitoring Agent** across all VMs, enabling centralized monitoring, decreasing setup time by 40%, and significantly increasing operational efficiency.

Order Database and Predictive Analytics :- Designed and implemented a MySQL Orders table with automated creation of 10,000+ records, enabling efficient forecasting. Transitioned from manual to real-time analysis using Python and pandas, reducing processing time by 40%. Developed an ARIMA model with 95% sales trend prediction accuracy and applied KMeans clustering to identify five customer segments, optimizing promotions and improving engagement. Delivered forecasts and behavior analyses that cut stakeholder decision-making time by 30%.

SKILLS

- **Programming & Development :** Python, Java, C++, C#, PHP, HTML, CSS, JavaScript, Bash, PowerShell; MySQL, PostgreSQL; Hadoop, MapReduce.
- **Cloud, DevOps & Administration:** AWS (S3, EC2, AMI, CloudFront), Google Cloud Platform, Azure, AWS CloudWatch, Git, Azure DevOps, Jenkins, Docker, Kubernetes; Linux (CentOS 7, Ubuntu), Windows Server 2012; TCP/IP, DNS, Basic Network Administration.
- **Professional & Technical Skills:** Troubleshooting, Customer Support, Multi-tasking, Technical Documentation, Communication Skills, Flexibility, Customer Focus.
